Analytic Table

Changes in Population Size, Number of Housing Units, Buildings, and Establishments (1941-2001)

Number and Percentage of Bahrain Population by Nationality (1941-2001)

Annual Rate of Population Growth by Nationality (1941-2001)

Changes in Illiteracy Prevalence for Bahraini Population (1971-2001)

Changes in Number and Percentage of Bahraini Population (18 years and above) with at least Secondary Education by Sex (1981-2001)

Changes in Labour Force Size by Nationality and Sex (1971-2001)

Changes in Unemployment Prevalence by Sex (1971-2001)

Population Tables

Population by Age Groups, Nationality and Sex - 2001

Percentage Distribution of Population by Age Groups,
According to Nationality and Sex - 2001

Population by Region, Nationality and Sex - 2001

Percentage Distribution of Population by Region,
According to Nationality and Sex - 2001

Non-Bahraini Population by Nationality Groups and Reason
of Residence - 2001

Percentage Distribution on Non-Bahraini Population by
Reason of Residence,
According to Nationality Groups - 2001

Total Population (15 Years +) by Highest Educational
Level, Nationality and Sex - 2001

Percentage Distribution of Population (15 Years +) by
Highest Educational Level, According to Nationality and
Sex - 2001

Population (15 Years +) Labour Force Participation,
Nationality and Sex

Percentage Distribution of Population (15 Years +) by
Labour Force Participation, According to Nationality and
Sex - 2001

Population (15 Years +) by Marital Status, Nationality
and Sex - 2001

Percentage Distribution of Population (15 Years +) by
Marital Status, According to Nationality and Sex - 2001

Disabled Population by Age Groups and Type of
Disability - 2001

Percentage Distribution of Disabled Population by Age
Groups, According to Type of Disability - 2001

Disabled Bahraini Population by Age Groups and Type of
Disability - 2001

Percentage Distribution of Disabled Bahraini
Population by Age Groups, According to Type of
Disability - 2001

Population (15 Years +) by Amount of Smoking,
Nationality and Sex - 2001

Percentage Distribution of Population (15 Years +) by
Amount of Smoking, According to Nationality and Sex -
2001

Private Households by Region and Household Type - 2001
Percentage Distribution of Private Households by
Region, According to Household Type - 2001

Private Bahraini Households by Region and Household
Type - 2001

Percentage Distribution of Private Bahraini Households
by Region, According to Household Type - 2001

Private Non-Bahraini Households by Region and
Household Type - 2001

Percentage Distribution of Private Non-Bahraini
Households by Region, According to Household Type -
2001

Housing Tables

Housing Units by Region and Housing Type - 2001

Percentage Distribution of Housing Units By Housing Type According to Region - 2001

Housing Units by Region and Water Resources - 2001

Percentage Distribution of Housing Units by Water Resources, According to Region - 2001

Housing Units by Region and Number of TVs - 2001

Percentage Distribution of Housing Units by Number of TVs, According to Region - 2001

Housing Units by Region and Number of Cars - 2001

Percentage Distribution of Housing Units by Number of Cars, According to Region - 2001

Housing Units by Region and Number of Private Parking Places - 2001

Percentage Distribution of Housing Units by Number of Private Parking Places, According to region - 2001

Housing Units by Region and Method of Garbage Collection - 2001

Percentage Distribution of Housing Units by Method of Garbage Collection, According to Region - 2001

Housing Units by Region and Method of Garbage Disposal - 2001

Percentage Distribution of Housing Units by Method of Garbage Disposal, According to Region - 2001

Housing Units by Region and Availability of Satellite Dish - 2001

Percentage Distribution of Housing Unit by Availability of Satellite Dish, According to Region - 2001

Housing Units by Region and Number of Personal Computers - 2001

Percentage Distribution of Housing Units by Number of Personal Computers, According to Region - 2001

Housing Units by Region and Internet Connection - 2001

Percentage Distribution of Housing Units by Internet Connection, According to Region - 2001

Housing Units by Region and Availability of Newspaper - 2001

Percentage Distribution of Housing Units by Availability of Newspaper, According to Region - 2001

Buildings Tables

Building by Region and Building Type - 2001

Percentage Distribution of Buildings by Region, According to Building Type - 2001

Buildings by Region and Building Usage - 2001

Percentage Distribution of Buildings by Building Usage, According to Region - 2001

Buildings by Region and Building Age - 2001

Percentage Distribution of Buildings by Building Age, According to Region - 2001

Establishments Table

Establishments by Region and Establishment Sector -2001

Percentage Distribution of Establishments by Establishment Sector, According to Region - 2001

Establishments by Major Economic Activity and Establishment Sector - 2001

Percentage Distribution of Establishments by major Economic Activity, According to Establishment Sector - 2001

Establishments by Capital Nationality and Establishment Sector - 2001

Percentage Distribution of Establishments by Establishment Sector, According to Capital Nationality-2001

Establishments by Region and Type of Major Wastes - 2001

Percentage Distribution of Establishment by Type of Major Wastes, According to Region - 2001

Establishments by Region and Method of Wastes Disposal - 2001

Percentage Distribution of Establishments by Method of Wastes Disposal, According to Region - 2001

Establishments By Establishment Sector and Internet Connection - 2001

Percentage Distribution of Establishments by Internet Connection, According to Establishment Sector - 2001

Introduction

The census is the hallmark of a developed nation. The census plays the most crucial and inevitable source of statistical information for the planning of a nation's future. In this regard, Bahrain stands foremost among all the leading countries around the world with its first census documented in the year 1941. Since then, several censuses have taken place with the last census held in the year 1991.

The 8th census organized in 2001 for Population, Housing, Buildings and Establishments has been segregated into stages:

Primary Stage: Consists of re-examining the basic laws of the census, preparing the budget and timetable of the various activities, choosing the appropriate questionnaires in calibration with different ministries, preparing the training manuals and devising out a comprehensive plan to introduce to the citizens the goals of the census through various media publicity as well as performing the test run for training the census personnel.

Field Work Stage: where the census-enabled workers gathered the information from the field on population housing, buildings and establishments.

Processing Stage: In which the field information is processed in three major activities: data editing and coding, data entry and data checking and evaluation.

Final Stage: Design of tables and graphs altogether with the Internet web site and produce and publish the census results and analysis.

This book contains the basic results in the form of tables and graphs, which highlights the general characteristics as well as comparative analysis of the present and previous census results.

What makes the Census 2001 innovative is that the census results, which used to be published in normal print media can now be accessed by users on the Internet website and on compact disk/CD.

BASIC DEFINITIONS AND CONCEPTS

FIRST - CENSUS DEFINITION, BASIS AND OBJECTIVES

SECOND - DEFINITIONS OF BASIC INDIVIDUAL ITEMS

THIRD - DEFINITIONS RELATED TO PRIVATE HOUSEHOLDS

FOURTH - DEFINITIONS RELATED TO BUILDINGS

FIFTH - DEFINITIONS RELATED TO HUSING UNITS (DWELLINGS)

SIXTH - DEFINITIONS RELATED TO ESTABLISHMENTS

SEVENTH - GEOGRAPHICAL REGIONS

BASIC RESULTS

FIRST - CENSUS DEFINITION, BASIS AND OBJECTIVES

A - CENSUS DEFINITION

The definition adopted by Bahrain is that recommended by the United Nations, that is "A Census of Population may be defined as the total process of collecting, compiling and publishing demographic, economic and social data pertaining, at a specific time, to all persons in a country or delimited territory."

The basic characteristics of population census are as follows:

1. Census is an official operation: That is, it must be carried out by the Government and on the basis of special legislation.
2. Individual - based enumeration: Information must be obtained for every person in the country.
3. Simultaneity: All households and individuals must be counted at the same point in time>
Different data items may have different time references.
4. Periodicity: Censuses are recommended to be conducted periodically, decennially or quinquennially. Trend analysis is greatly facilitated if censuses are equi-spaced.

B- THE 2001 CENSUS BASIS

Censuses are generally undertaken on two different bases: De facto and De jure. (1) Under the De facto basis population are counted according to their actual place of residence at the census date irrespective of where they usually live. Conversely, (2) De jure basis means that population are counted according to their usual place of residence irrespective of where they exist at the census time. The De jure basis is the one followed in the 2001 Census.

C- THE 2001 CENSUS OBJECTIVES

The objectives of the 2001 Census can be defined as follows:

1. Determining the major demographic and socio-economic characteristics of the population.
2. Providing necessary data for assessing the changes occurred in the State of Bahrain.
3. Furnishing data on labour force structures, which may help accelerating job - Bahrainization process.
4. Availing data on internal migration and immigration, the latter is important in formulating policies concerning foreign labour force recruitment.
5. Providing necessary information for sectoral planning (health, education, etc.).
6. Creating up-to-date sampling frames for future surveys.

7. Portraying housing conditions which would help setting construction policies.
8. Identifying geographic areas lacking certain services so that remedial measures can be taken.
9. Providing data on buildings conditions (private and public) and their occupancy status, so current and future housing needs can properly be evaluated.
10. Determining the basic characteristics of establishments whether engaged in economic or social activities and whether they are public or private.
11. Updating the databases of Central Population Register.
12. Updating buildings and housing databases in the Register of Addresses.
13. Providing database for the purpose of forecasting population and manpower.
14. Providing database crucial for studying some social habits.
15. Providing database for the public use of health establishment.

SECOND - DEFINITIONS OF BASIC INDIVIDUAL ITEMS

1- Head of household

Is the person acknowledged as such by other household members. In most cases the head of the household bears the chief responsibility for the economic maintenance of the household.

2- Relationship to head of household

The relationship between household members and the head of household, e.g., spouse, son, daughter, grandson / daughter...etc.

3- Sex

This is the person's gender i.e. male or female.

4- Age

Age is the time span between the date of birth and the date of the census expressed in completed years.

5- Nationality

This is the legal nationality of the person based on which his / her passport was issued. The person is Bahraini if his / her father is as such regardless of the nationality of his / her mother. A person may have acquired Bahraini citizenship according to the law. The nationality of binational or multinational Non-Bahraini person is determined on the basis of the passport carrying the entry visa.

6- Highest Educational Level (10 years +)

It is the highest degree achieved by the person, and in regards for the person who did not receive any qualification, it represents his / her ability in reading & writing, described further as follows:

Illiterate / read only

Read and write

Refers to the person who did not finish studies but has the capability to read and write simple sentences in any language in his daily life.

The rest of the educational level will be as follows:

Primary Certificate Secondary Certificate High Diploma

Preparatory Certificate Above Secondary/Diploma Master Degree

Above Preparatory B.Sc. or B.A. Doctorate Degree

7- Employment Status (15 years +)

It refers to the person - work relationship during the reference week (07/04/2001). It consists of the following categories:

-Employer

A person who operates his / her own economic enterprise or engages independently in a profession for trade and hires one or more employees.

-Self-employed

A person who operates his / her own economic enterprise or engages independently in a profession or trade and hires nobody.

-Paid employee

A person who works for a public or private organization and receives regular wages / salary whether in cash or in kind.

-Unpaid worker

A person works for an enterprise, usually owned by some of his relatives, without receiving

- Unemployed and worked before

Refers to a person who has ever engaged in a work before, but is unemployed during the reference time, though he / she is able and looking for work.

-Unemployed and never worked before

Refers to a person who has never engaged in a work before and looking for a job during the reference time.

-Full-time student

Refers to a person attending regular education that leads to a recognizable qualification.

-Home-maker

Refers to a non-economically active person usually female, who is engaged in home duties or supervising servants doing the same.

-Income recipient

Refers to a person who is physically able to work but does not work willingly, in the reference time, because he / she has a regular source of income.

-Unable to work

Refers to a physically handicapped person aged (12-64) years who, because of his / her infirmity, cannot perform any gainful work.

-No desire to work

A person aged 12-64 years able to work but not working nor seeking work because he / she elected not to work.

8- Marital Status (15 years +)

This refers to the personal status with regard to marriage / divorce laws and customs. It includes the following categories:

-Never Married

Refers to a person who has never been in a marital life before or a person who has a civil contract but not living with partner.

-Married

Refers to a person who is legally married with respect to marriage laws and customs.

-Divorced

Refers to an ever-married person - but not currently married - whose marriage has been dissolved by divorce.

-Widowed

Refers to an ever-married person - but not currently married - whose marriage has been dissolved by the death of the spouse.

9- Disability / Infirmary

Refers to the kind of physical or mental impairment that prevents or limits the person's activity / movement as compared with a healthy person in his / her age and other socio-economic characteristics. It includes the following cases:

-Blind

Refers to a person who is unable to see.

- Deaf

The severe limitation or absence of hearing sense.

-Deaf and Mute

Inability to hear and speak

-Amputee

Refers to a person with a missing limb or both. It also includes persons missing any other organ pending on that represents a real impairment.

-Mentally retarded disorder

Refers to a person lacking correspondence between his / her mental behavior and his / her age.

-Paralyzed

It is the partial or total loss of bodily mobility.

-Others

Includes persons with visible impairments other than above.

THIRD - DEFINITIONS RELATED TO PRIVATE HOUSEHOLDS

Household

A household is a group of persons who make common provision for food or other essentials for living. It may also consist of one person who makes provision for his own food or other essentials for living.

A Private household may be classified as follows:

1- One-person household

Defined as a household consisting of one person only.

2- One-person with servant/s household

Defined as a household consisting of one person with one or more servants.

3- Nuclear household

Defined as a household consisting entirely of a single household nucleus. As an exception, servants and drivers are considered members of the nuclear household.

4- Extended household

Defined as a household consisting of persons related by blood or affinity who are sharing food. One person is selected as head of extended household.

This includes the following cases:

- A single household nucleus and other persons related to the nucleus.
- Two or more household nuclei related to each other.
- Two or more household nuclei related to each other plus other persons related to at least one of the nuclei.
- Two or more persons related to each other and none of them is a member of a nucleus household.

5- Composite household

Defined as a household consisting of persons related and not related who are sharing food. One person is selected as head of composite household. This includes the following cases:

- A single household nucleus plus other persons not related to the family.
- A single household nucleus plus other persons some of whom may be related to the family and some others may not.

- Two or more unrelated household nuclei.
- Two or more related / unrelated household nuclei plus other persons unrelated to any of these families.
- Two or more related / unrelated household nuclei plus other persons some of whom may be related to any of these households and some others may not.
- Unrelated persons who make provisions for their own food and other essentials for living.

FOURTH - DEFINITIONS RELATED TO BUILDINGS

1- Building

A building is an independent free-standing structure comprising one or more rooms, covered by a roof and usually enclosed within external walls or dividing walls which extend from the foundation to the roof. A building may be used for residence, work or both, and it may be vacant during the reference time.

Types of buildings are:

Apartment building

This is an independent building with one storey or more comprising two or more flats. The address of each flat must include the building number. Flats can be reached through the building entrance, stairs or lift(s) that serve all flats jointly. Most often the apartment building's ground floor consists of shops or establishment, the address of which does not include the number of the building entrance. In such a situation, these shops / establishments are considered parts of the building and not independent buildings.

Villa

A villa is a modern separate detached and independent structure with direct entrance from the street. Usually, it is surrounded by a fence and may have a room or rooms within this fence as an annex to the main structure, and / or private parking place. Upper floor(s), if existing, are linked to the ground floor with internal stairs.

Conventional house / housing villa

It is a modern separate structure with direct entrance from the street. The structure is usually attached, at least from one side, to another structure. It may have more than one storey, each with an independent entrance directly from the street and independent address.

Traditional (Arab) house

It is a separate and independent structure with an old design, in which there is an interior courtyard surrounded by rooms. The entrance of the house leads directly to the street. The outer walls are either attached to another building or directly on the street. In other words, this type of structure does not have a space separating it from the adjacent building or the street.

Garden villa

It is a building out of several buildings attached or detached, designed separately as a single villa, but they are sharing one piece of land, located on public road, which can contain services or entertainment quarters and internal roads.

Shop / Store

This is an area with walls covered by a roof independent entrance from the street and used usually for business, commercial, industrial or service purposes. The shop / store, which must have an independent municipal number, may be so big that it is divided into smaller shops / stores connected with each other internally.

Attached shops

These are shops / stores attached together, each has a separate address. For census purposes, they are considered as one building in which the address of the first shop is taken as the building reference number.

Shops and dwellings

This is a separate structure in which the first level is occupied by shops and the second level is made of apartments used for residence or business. It differs from the apartment building in such a way that it does not have a main entrance leading to the apartments. Each apartment has its own entrance and address.

Establishment building

This is a structure built essentially to be occupied by an establishment whether engaged in economic, social, educational or religious activities. A building of this nature is originally designed not to be used as living quarters. As for establishments occupying buildings which were not intended for business, the type of building is determined on the basis of the outer shape of the structure (i.e. villa, apartment building,...etc.).

Others

This category includes buildings not identified above. Examples are kiosks, tents, rooms, caravans.

2- Building Age

It's the actual or estimated number of years between the start of constructing this building and the census reference day. Building age is measured by completed years ignoring the months.

Shop / Store

This is an area with walls covered by a roof independent entrance from the street and used usually for business, commercial, industrial or service purposes. The shop / store, which must have an independent municipal number, may be so big that it is divided into smaller shops / stores connected with each other internally.

Attached shops

These are shops / stores attached together, each has a separate address. For census purposes, they are considered as one building in which the address of the first shop is taken as the building reference number.

Shops and dwellings

This is a separate structure in which the first level is occupied by shops and the second level is made of apartments used for residence or business. It differs from the apartment building in such a way that it does not have a main entrance leading to the apartments. Each apartment has its own entrance and address.

Establishment building

This is a structure built essentially to be occupied by an establishment whether engaged in economic, social, educational or religious activities. A building of this nature is originally designed not to be used as living quarters. As for establishments occupying buildings which were not intended for business, the type of building is determined on the basis of the outer shape of the structure (i.e. villa, apartment building,...etc.).

Others

This category includes buildings not identified above. Examples are kiosks, tents, rooms, caravans.

2- Building Age

It's the actual or estimated number of years between the start of constructing this building and the census reference day. Building age is measured by completed years ignoring the months.

FIFTH - DEFINITIONS RELATED TO HUSING UNITS (DWELLINGS)

1- Housing Unit (Dwelling)

This is a building or a part of it originally prepared for residence and has an independent entrance.

Housing units are classified as follows:

Villa

Garden Villa

Conventional House / Housing Villa

Traditional (Arab) House.

(Above types are defined in definition of building types).

Flat

It is a part of a larger building and consists of one or more rooms with a bathroom at least (it may not have a kitchen). A flat has a separate door into living area but may share a common corridor or hallway with adjoining flats.

Annex

This is a separate structure built within the same area of the main building usually inside a fence and used as servant quarters or for other purposes. The annex is considered an independent housing unit if it is occupied by a household different from the one occupying the main building. Thus, an annex is not an independent housing unit if it is occupied by the same household of the main building.

An annex may be a split part of a mosque, matam or establishment building.

Collective group quarters

This is a structurally separate and independent place of abode intended for habitation by large groups of individuals or several households, with no blood relationship among them. Such quarters usually have certain common facilities such as cooking and toilet installation, which are shared by the occupants. Examples are workers dwellings, dormitories and teacher hostels.

2- Source of Drinking Water

This defines the principal source of drinking water which can be any of the following choices:

Public network

That is when the housing unit uses, as drinking water, the water of the central public network,, which is connected with water distillation unit.

Private purification (Plant)

This refers to the drinking water obtained from the tankers wandering the streets to sell water.

Bottles

This means that the housing unit depends on the bottles of preserved or mineral water (e.g. Health or Aquacool Water) to get its drinking water.

Own purification plan

This is when the housing unit purifies water, for drinking, inside the house using either a primitive or modern method.

3- Garbage Collection Method

It is the way to collect and transport the garbage to processing plant or the disposal of it by the Municipality Authorities and private establishment or by private or public concerned.

Covered pan / Garbage bin with bag

Includes bag in the bin to collect the garbage.

Uncovered pan / Garbage bin without bag

Use of a garbage bin without bag.

Garbage bags

Use of bag made of plastic for the purpose of collecting garbage.

Others

Any other method to collect garbage different than mentioned above.

4- Method of Garbage Disposal

It is the method for getting rid of domestic garbage classified as follows:

Through garbage collecting persons

The method of disposing domestic garbage through garbage collecting person.

Disposal of garbage in particular or specific place

It is method of disposal of garbage by keeping it in a container outside the house.

Others

Any other method of garbage disposal different than mentioned above.

5- Connection to Internet

It is the service in which the local telecommunication company connects their subscribers to the internet by charging special fees.

Definition of Internet

The word internet is short for "Internetwork" which refers to the world wide web. Internet differs from other networks in the sense that it does not have a centre and nobody supervises it. It uses TCP / IP protocols and is an open network for the whole world. And because of these characteristics, the use of the Internet spreads at a phenomenal rate all over the world as users connected to the Internet can access huge amounts of data and information of all connected networks.

SIXTH - DEFINITIONS RELATED TO ESTABLISHMENTS

1- Establishment

It is an enterprise, or a part of it, which independently engages in one, or predominately one kind of economic or social activity. It may be owned by individual(s) or government agencies, and it may operate for profit or non-profit.

2- Establishment Sector

This is the economic sector of the establishment for which the person works. It comprises the following alternatives:

Private individual

It is an establishment entirely owned by a single person.

Private company

It is an establishment owned by a group of persons in the form of a company, irrespective of owners' nationality or the legal status of the establishment.

Governmental

This is a Government-owned establishment irrespective of the nature of its activity.

Joint venture

It is an establishment owned jointly by private and governmental bodies irrespective of the share of each.

Co-operative

It is establishment owned co-operatively by a large number of shareholders..

Others

Include establishments owned by foreign governments.

3- Establishment's Major Activity

This is type of work or production which the establishment do, either a product or service. The establishment can have several activities, but will be represented by its main activity and this classification is judged by several rules in which the most important comes first: Number of Employees, Capital Amount, Profit Amount.

4- Capital Nationality

Establishment's capital is the amount of shares or partner shares or the amount of money which in case single ownership companies has been set aside as capital whether it belongs to Bahraini or Non-Bahraini citizens, and capital nationality shows the Government or companies share in the capital and the capital sources are as follows:

Bahraini	GCC
Non-GCC	Bahraini & GCC
Bahraini & Non-GCC	GCC & Non-GCC
Bahraini & GCC	& Non-GCC

5- Type of Major Wastes / Garbage

This is the type of item which we need to get rid of, be it hard, liquid or in gas form.

Liquid Form

It is the liquid waste be it processed or not, which comes from industries or by human sources to the environment.

Solid (Hard) Form

It is unusable item which could be dangerous some time, it contains very little liquid (industrial) and commercial waste, agricultural waste, domestic waste and mining waste).

Gaseous Form

It is the gas waste, be it processed or not, which comes from industries or by human sources to the environment.

6- Method of Disposing Major Wastes / Garbage

It is the method in which we get rid of the garbage by following options:

Municipality

The method of burying garbage under the ground used for domestic and commercial garbage.

Burning

Method of burning garbage in an environmental-friendly oven / incinerator.

Burying

The method of using engineering standard specifications for burying toxic wastes.

Sea or Land Reclaiming

The method of reclaiming the sea or land construction and demolished debris and liquid processed waste.

Recycling

The method of recycling the waste material and garbage back in an environmental way. For example, aluminum is melted and used again.

Selling

Selling major wastes or garbage for a fee to entities / company.

Other

Method of disposing major wastes / garbage different from methods mentioned above.

SEVENTH - GEOGRAPHICAL REGIONS

The State of Bahrain was divided into 12 major geographical regions, each major region comprises of towns and villages as listed below.

- 1- Hidd
Hidd Town.
- 2- Muharraq
Muharraq Town - Busaiteen - Al-Dair - Samaheej - Arad - Halat Al-Sletah - Halat Al-Neaim - Qalali.
- 3- Manama
Manama Town - Al-Burhama - Salihiya - Zinj - Bilad Al-Qadeem - Khamis - Abu-Bham - South Sehla - Nabih Saleh.
- 4- Jidhafs
Jidhafs Town - Sanabis - Tashan - Al-Musalla - Al-Daih - Karbabad - Jebelat Hibashi - Al-Qal'ah - North Sehla - Hillat Abdul Saleh - Al-Qadam - Al-Maqsha - Karranah - Bu Quwah - Al-Hajar - Abu Saiba - Shakhura.
- 5- Northern Region
Jannusan - Muqabah - Jid Al-Jaj - Sar - Barbar - Al-Markh - Al-Diraz - Bani Jamrah - Al-Qurayya - Budaiya - Janabiyah - Other Northern Islands.
- 6- Sitra
Industrial Area - Mahazza - Al-Qarya - Murqoban - Kharjiya - Abu Al-Aish - Wadyan - Sufala - Al-Hamriya - Um Al-Baidh - East Eker - West Eker - Ma'ameer - Nuwaidrat.
- 7- Central Region
Tubli - Salmabad - Jid Ali - Jerdab - A'Ali - Al-Nasfa - Sanad - Buri.
- 8- Isa Town
Isa Town.

9- Riffa

East Riffa - West Riffa - Safreh - Awali - Al-Riffah - Al-Sakhir - Al-Rumaythah.

10- Western Region

Al-Jasrah - Al-Hamalah - Damistan - Karzak-kan - Malkiya - Sadad - Shahrakkan - Dar Kulaib - Zallaq - Jazaer Beach - Um-Jeder - Um Al-Na'san - King Fahad Causeway - Al-Mamtalah.

11- Southern Region

Askar - Ras Zuwayed - Muzarra - Ras Abu Jurjur - Hafirah - Jau - Al-Dur -Um al-Summan - Hawar Islands.

12- Hamad Town

Hamad Town.

First: Population Census

- 1- On the night of April 7, 2001, Bahrain population totaled 650,604 persons, of whom 405,667 were Bahrainis and 244,937 were non-Bahrainis with percentages of 62.4% and 37.6%, respectively.
- 2- The population growth rate between 1991 and 2001 is 2.7%, which is lower than the previous census growth rate of 3.6%. The annual growth rate for the Bahraini population between 1991 and 2001 was around 2.5% compared with the growth rate between 1981 and 1991 at 2.9%.
- 3- More than 50% of the islands population lived in the areas of Manama, Muharraq and Riffa with the percentages of population in these three areas as 23.6%, 14.1% and 12.3%, respectively.
- 4- The illiteracy rate among Bahrainis registered a significant drop during the last ten years between the 1991 and 2001 population censuses. The illiteracy rate was only 7.5% for males, 17.0% for females and 12.3% for both sexes. Correspondingly, illiteracy rate in 1991 was 13.3% for males, 28.7% for females and 21.0% for both sexes.
- 5- The illiteracy rate for Bahraini population with ages 10 to 44 years in 2001 is almost just a half of 1991. The illiteracy rate for 2001 was 2.7% (1.4% for males and 4.0% for females) compared to 6.4% in 1991 (2.4% for males and 10.5% for females).
- 6- The 2001 census reported a total of 121,918 Bahrainis who finished at least secondary education (53.0% of Bahraini population ages 18 years and above), of whom 61,794 (53.7%) were males and 60,124 (52.2%) were females. In contrast, the number in 1991 were 66,819 (39.1%) for both sexes, 36,433 (42.6%) for males and 30,386 (35.6%) for females.
- 7- The number of Bahrainis who finished at least university education almost doubled. In 2001, there were 24,760 (12.5% of the 22 years old and above) persons, of whom 13,012 (13.2%) were males and 11,748 (11.8%) were females. On the other hand, the total number in 1991 was 11,463 (7.8%), of whom 6,682 (9.1%) were males and 4781 (6.5%) were females.
- 8- The economically active population (working and unemployed) and with ages 15 years or older) totaled 308,341 persons of whom 127,121 were Bahrainis and 181,220 were non-Bahrainis.
- 9- The number of working Bahraini population is 110,985 in 2001 compared with 77,268 in 1991.
- 10- Employed Bahraini women accounted for 23.5% of the total working Bahraini population, which is higher than the 1991 percentage of 17.1%.
- 11- The labour force participation rate of Bahraini women was 25.6% of the total Bahraini female economically active population (15 years or older) which is higher than 1991 is percentage of 18.7% only.
- 12- The rate of unemployment of the population with ages 15 years and older was 5.5% (4.1% for males and 10.5% for females) in 2001. In comparison the 1991 unemployment rate was 6.3% (5.2% for males and 11.8% for females).
- 13- Overall, the rate of disability among Bahrainis represented only less than 1% of the total population.
- 14- The percentage of Bahraini smokers in 2001 comprised 10.6% of the total Bahrain population with ages 15 years or older. This percentage is lower by 3.8% compared to the 1991 percentage of 14.4%.

Second: Housing Units Census

1. The number of housing units in Bahrain totaled 105,686. Of these housing units, private villas accounted for 18.8%, conventional houses / housing villas were 25.9% and traditional houses accounted for 15.7%. Around 43.7% of these traditional houses were situated in the Manama and Muharrq areas.
2. Housing units that relied on the main water networks as a source of drinking water accounted for 10.6% while units using publicly distributed drinking water upped to 72.0%. The homes relying on bottled water represented a substantial 14.8%.
3. Ninety-seven percent of all housing units in Bahrain have at least one TV set. Around 9.9% of all housing units had four or more TV sets.
4. More than half of all housing units have satellite dishes (62.2%).
5. Around 73% of all housing units were owners at least one car, of which 3.8% had four or more cars.
6. The percentage of housing units with at least one personal computer (PC) was 33.4%. Only around one percent of all housing units owned three or more PCs.
7. The percentage of al housing units who have Internet connection is 18.2%.
8. Fifty-six percent of all housing units have daily newspapers available to them.

Third: Buildings Census

1. The number of buildings in Bahrain totaled 105,603 in 2001 census. Most of these were conventional houses / housing villas (houses whose structure is attached to an adjacent house from at least one side) which totaled for 30,962. Then these are followed by 23,142 private villas and 20,184 traditional houses (old designed houses with interior courtyard surrounded by the rooms). There were a total of 8,076 apartment buildings and 3,501 establishment buildings.
2. Buildings used for residential purposes represented 68.7%. The remaining 31.3% of the buildings had the following uses 10.7% for business, 3.7% for both residential and business purposes, 10.6% were vacant, 2.0% deserted and ruined buildings and 4.3% were annexes.
3. Buildings constructed during the 2001 census period up to at most four years ago constituted eight percent of all buildings. Buildings with building ages of 25 years or older comprised 29%, of which 55% were situated in Manama and Muharraq.

Fourth: Establishment Census

1. The number of working establishments in Bahrain totaled 26,923, of which the private sector owns 23,074 (rate of 85.7% of the total establishments). Around 41.7% of all the establishments were based in the Manama area alone.
2. The major economic activity of about 46.8% of the establishments was trade and repair, followed by manufacturing industries accounting for 17.8% and by social and personal services representing 11.0%.
3. The percentage of establishments connected to the Internet was 11.6%, of which 46.3% were joint establishments, 39.7% were private establishments and 35.5% were government establishments.

NOTE:

Census in 2001 utilized a new methodology for data on sponsored individuals. One question for the sponsor about the present status of these sponsored individuals was included in the Census 2001 form. However, enumerators were limited in locating the exact individuals and their current residence. Thus, the data on sponsored individuals provided the 2001 Census with coverage of their approximate population but unknown details of their characteristics were left unknown.
